WEDNESDAY MAY 12, 1909

The time never comes when a reconstruction does not interest some great interest.—Heber Newton.

It is not a question of control against the people of Hawaii.

Reputable men in the Japanese colony never realize that they are not in a position to take them to task.

Let the American-Hawaiian steamship operators have the benefit of your opinion on whether the new line should be established.

STAND PAT AGAINST AGITATORS.

The American-Hawaiian Steamship Association is opposed to any agitation against the American-Hawaiian line.

This agitation is not a new thing, but it is now more serious than ever.

Let the American-Hawaiian steamship operators have the benefit of your opinion on whether the new line should be established.

DAUGHTER OF ARCHIE MACKILLOP

Happy Young Bride Is
On Her Way To
The Orient

The daughter of Archie MacKillop passed through this port on the Mongolia on her wedding trip. How it all came about is told in the Call as follows:

From a chance meeting in midtown on a trans-Pacific liner a few months ago, many years after they had first met as boy and girl, there has developed a romance that will reach the honeymoon stage next Tuesday at the St. Francis hotel in the marriage of Miss Georgiana Elizabeth MacKillop and J. S. Houston Frank, manager of the firm of Mendelson & Frank, silk dealers of Yokohama, Paris and London. Frank was graduated from the University of California with the class of 1905, and is one of the wealthiest young men in San Francisco, his home city.

The young couple will spend most of their honeymoon in Yokohama. Miss MacKillop's home is at 301 South California street.

Miss MacKillop, with her father Archie MacKillop, who is connected with the Crown distilleries, journeyed to Honolulu recently.

Frank, who was in Yokohama in charge of the silk firm, was called off business to San Francisco. The vessel he sailed on touched at Honolulu, and soon after Frank discovered that Miss MacKillop with her father were on the ship bound for home. The old girl and boy friendship was at once renewed, and developed rapidly into affection. March 17 the couple announced their engagement. May 4 a local Presbyterian minister will unite them.

Miss Christine MacKillop, sister of the bride to be, will act as bridesmaid.

MRS. JOHN HENDERSON.

WAS SO RUN DOWN
LIFE NOT WORTH LIVING.

A Few Bottles of Peruna
Restored Me to Health.

Mrs. John Henderson, 2 Overdale Ave., Montreal, Can., writes:

"I was much distressed with neuralgia and was so run down that life was not worth living. I tried a great many remedies, but all to no effect.

"I met a friend of mine, and told her of my ailment. She advised me to try her remedy, Peruna.

"Although I had no faith in Peruna, I took her advice, and am pleased to state that the neuralgia has entirely left me, and have gained so in health that I feel just like my old self again.

"I am enjoying the best of health. We have on file many thousand testimonials like the above. We can give our readers only a slight glimpse of the vast array of unsolicited endorsements Dr. Hartman is receiving.

OMAPIO EXCHANGE NEARLY COMPLETED

Governor Frear yesterday virtually completed the negotiations with the Maui Agricultural Company for the exchange by the Government of the Omapio cane land for the Haiku pineapple lands. The latter tract consists of 874 acres of good land, nearly all of which is suitable for the raising of pineapples. The Omapio lands comprise about 1,200 acres, including gulch land. Nearly all of it is good sugar land.

This deal has been under way for something over a year. Governor Frear has been to Maui two or three times and has gone over both tracts thoroughly.

The new land acquired by the Territory through this exchange will be set up as soon as possible and thrown open for homesteading. It will accommodate a good-sized colony of small farmers. Much of the land in the vicinity is already in pineapples, which do remarkably well there.

Alcohol in Medicines

Alcohol is the best known preservative of medical compounds, and the average proprietary medicine contains from 15 percent to 22 percent, which is the smallest possible amount to preserve the ingredients, while the average doctor's prescription contains from 25 percent to 50 percent.

Such standard preparations as Lydia E. Pinkham's Vegetable Compound contains but 18 percent, and they even put the Compound up in tablet form, which the over-scrupulous woman, who objects to alcohol in any degree, may use.

When the specifications are ready bids will have to be advertised for for thirty days. This means that, were work to begin on the date that the appropriation is available, tenders would have to be called for by the 15th of this month. This would

be a practical impossibility, owing to the inability of the board to reach a decision regarding the location.

When bids are called for, contractors will probably come over here from the mainland, go over the ground thoroughly, and then submit their bids.

The bids will be opened by the contracting quartermaster. In all probability, instead of at Washington, Captain Castner will then make a digest of the various bids, and will submit them to Washington with his recommendations. The War Department will then have to go over the matter and make the award.

After the awarding of the job and the signing of the contract, the successful bidder will have time to erect his plant on the grounds and employ his workmen, so that even after everything is settled it will require some time to get building operations started.

It is the desire of the Army authorities to get work under way as soon as possible, however, so it is likely that the early autumn will see an army of workmen again located at Lihouha.

Though the actual construction will be done by contract, Captain Castner, as contracting quartermaster, will have to supervise it personally and see that all work is done in accordance with the specifications.

John Burroughs, the naturalist, who arrived on the Mongolia yesterday, called on Governor Frear this morning, accompanied by Dr. Cooper.

At least something has been gained here the American-Hawaiian steamship people let a contract for a steamer with passenger accommodations to ply between this port and San Francisco.

But isn't twenty-five passengers a very small capacity to be offered by the line that carries the major portion of the heavy millions dollars worth of freight shipped to and from these islands and the mainland?

The new steamer of this line should have a passenger capacity of one hundred, and then it would not be overdoing the thing.

This line is bound to grow. The people are enjoying this way. And the American-Hawaiian steamship operators should have some measure of success in the development of inter-island passenger traffic with the mainland, particularly as this Territory is situated just on the question of the coastwise shipping protection.

For a line that carries the freight given the American-Hawaiian line, the steamship with first class accommodations for one hundred people is none too much. Sooner or later this Territory will support the interests that boost for Hawaii and are willing to repatriate freight business with ships on which passengers may travel.

The American-Hawaiian line is big enough and wealthy enough and gets enough of Hawaii's business to do something worth while in passenger of ferries.

POST'S LOCATION.

(Continued from Page 1)

The plans for the big brigade post are now being drawn in the Quartermaster-General's Department at Washington, and will probably be ready before very long. When the plans are completed they will be sent to Captain Castner, instructing quartermaster here, who will then send out the plans and specifications to probable bidders.

As the project is a large one, it is expected that big contracting firms all over the mainland will submit tenders as soon as the bids are advertised for and specifications are ready.

On July 1 there will be \$200,000 available to commence work on the big post. As the total cost of construction will probably approach ten times that amount, it will be up to the War Department to decide where the start shall be made. Specifications will be sent out for only that portion of the work which it is decided can be completed within the \$200,000 mark.
